

When it's right, it just clicks

Philips Respironics Amara – full face mask

Mask fitting guide

- 1** Before putting on the mask, grip the headgear clips and twist away from the frame to disconnect.

Note: Wash hands and face before use; avoid moisturizers and lotions.

- 2** Pull the mask over your head and hold it against your face.

Note: You may need to loosen the headgear to a larger setting.

- 3** Holding the mask in place, reconnect the headgear clips by pushing them back onto the frame.

Note: The headgear should lie flat against the back of your head.

- 4** Fully extend the forehead adjuster by pressing and holding the button and sliding the frame away from your face.

Note: There should be minimal pressure felt on the bridge of your nose.

- 5** Starting with the lower straps first, pull back the headgear tabs evenly to achieve a comfortable fit.

Note: Do not overtighten. The forehead pad should only lightly touch the forehead.

- 6** Final adjustments for comfort and seal should be made while lying down with your device pressure applied.

Note: Should excessive leaks persist, try an alternate cushion size.

Additional details on fitting may be found in the instructions that accompany your mask. A larger frame is also available by request.
