INDICATIONS FOR USE

The Neotech RAM Cannula is intended to be used in the administration of oxygen through the nares to pediatric (neonates, infants and children) patients.

Note: Ensure all cannula connections are properly secured.

Step 3

Begin gas flow.

Step 4

Insert prongs into patient's nares.

Note: Allow small gap between patient's septum and base of prongs.

Secure cannula to face with EZ-Hold® Tubing and Cannula Holder or comparable product.

Step 6

Replace Neotech RAM Cannula every 14 days or per hospital protocol, whichever is sooner.
