

## ABC Mastectomy Bra FAQ

**Q: What's the difference between a post-mastectomy bra and regular bra?**

**A:** Post-mastectomy bras are designed with a pocket on the inside of the bra cup. This pocket is designed to hold your breast prosthesis in place. Additionally, there are design features that allow for the added weight of a silicone breast form. There are a variety of bras because there are a variety of women. A certified fitter will consult with you to determine which bra works best for you.

**Q: How will I know which bra will work the best for me?**

**A:** Every woman is designed differently. It's best to be fitted by a certified mastectomy fitter before you purchase your post-mastectomy bra. The fitter will consult with you to determine if a seamless molded cup works better than a soft cup bra. Regardless of how much you think you know about bras, it's always best to see how it fits on you. When choosing a bra you want to consider three things: comfort, confidence, and ease of wear.

**Q: Now that I have to wear a breast form, will I have to wear an unattractive and unflattering bra?**

**A:** In your search to find the right bra, you will discover that many post-mastectomy bras by ABC are designed to reflect the current fashion trends in the market. There are a number of bras that provide the beauty you want as well as the support you need.
