

Amoena Adapt Light Breast Form

Every body and every scar is different. That's why Amoena designed a moldable breast form that hugs and shapes to your contours — introducing Adapt Light with Comfort+.

Why to choose Adapt Light Breast Forms?

Breast cancer surgeries, no matter how precise, bring different results for every woman.

Adapt Light modernizes and re-imagines the popular Individual Light breast form, now including better moldable silicone. This allows the form to adapt to the landscape of your chest wall and hugs your unique body without losing its shape.

The latest Amoena design innovation

- **Form** - An innovative design provides a closer fit to the chest wall, around tissue or scars, to ensure a secure fit all day.
- **Fit** - High quality Amoena moldable silicone that adapts to the unique shape of your body and holds its shape - even as you move.
- **Feel** - Soft pearl back that helps air to flow freely and comfort+ temperature equalizing technology work together to reduce perspiration behind the form.
